*\*Program will be offered on a first-come, first-served basis for qualified applicants looking to trade their old, inefficient refrigerators for new ENERGY STAR certified refrigerators. Delivery will take an estimated 4-6 weeks once the refrigerators are ordered.*

*\*\*Applicant must be a scheduled account holder of an electric utility on the islands of Hawai'i, Lāna'i, Maui, Molokai or O'ahu who contributes to the Public Benefit Fund where the electricity-saving energy efficiency measure has been installed. Rebates are awarded only to an eligible Account Holder.*

**SAVE MORE  
WITH  
ENERGY STAR®**

**ENERGY STAR**-certified appliances are required to use 20% less energy than models that have not earned the ENERGY STAR.

**Slash your electricity bill!**  
Replacing your old appliances with an ENERGY STAR certified model can save you loads annually!

**Protect the environment.**  
More than 90% of Hawai'i's energy comes from imported oil. Generating power from oil pollutes the atmosphere with carbon emissions, contributing to climate change.

ENERGY STAR-certified refrigerators use less energy and help us reduce our impact on the environment.  
When you trade in your old fridge/freezer, we make sure it's recycled properly.

## APPLIANCE TRADE-UP PROGRAM FOR NORTH KOHALA RESIDENTS!

### *Frequently Asked Questions (FAQs)*

#### ***What is the Appliance Trade-Up Program?***

The appliance trade-up program is a community-based program powered by Hawai'i Energy in partnership with Partners in Development Foundation, to provide residents of North Kohala the opportunity to become more energy-efficient via an ENERGY STAR® certified appliance trade-in. The offer is open to residents of the following North Kohala zip codes: 96719 and 96755.

#### ***How does the Appliance Trade-Up Program work?***

To qualify, you must have an existing refrigerator and/or freezer to exchange in order to purchase an ENERGY STAR replacement model. It is designed to provide the residents of North Kohala new energy efficient ENERGY STAR refrigerators and freezers at substantially discounted rates. Hawai'i Energy, with key partners, orders refrigerators and freezers in bulk and coordinates all ground transportation logistics. Hawai'i Energy also coordinates the removal of refrigerators and freezers to be properly recycled at no cost to you.

#### ***Why do we need to exchange old (in-use) refrigerators and freezers?***

The program is a "one for one" exchange, so if you have a working refrigerator and/or freezer to trade in, you can participate in the program – we'll even take your old chest freezers as part of the exchange. The goal is to remove as many of these old, energy-wasting appliances, so the community can reduce monthly energy costs and put money back into the residents' pockets.

#### ***What are ENERGY STAR appliances?***

ENERGY STAR appliances are independently certified to save money and energy! ENERGY STAR certified refrigerators use significantly less energy than non-ENERGY STAR models and therefore lower household utility costs. Replacing a ten-year-old refrigerator with an ENERGY STAR model could save you over \$200 every year. Look for the ENERGY STAR label any time you are in the market for appliances. For more information regarding ENERGY STAR appliances visit: <https://www.energystar.gov/products/appliances/refrigerators>.

#### ***Why is saving energy important?***

Hawai'i has the nation's highest electricity rates and our costs are generally around three times more than the national average. An old refrigerator uses about twice as much energy as a new ENERGY STAR® certified refrigerator. Energy conservation and efficiency is the easiest and most affordable way to save money on your electric bill. To learn more about ways to save, visit [www.HawaiiEnergy.com](http://www.HawaiiEnergy.com).

#### ***What types of appliances are available?***

- General Electric ENERGY STAR 17.5 cubic foot Refrigerator (with top freezer) – Dimensions are approximately 68 in. (height), 33 in. (depth), 28 in. (width)
- General Electric ENERGY STAR 21.1 cubic foot Refrigerator (with top freezer) – Dimensions are approximately 67 in. (height), 34 in (depth), 33 in. (width)
- General Electric ENERGY STAR 17.3 cubic foot Upright Freezer (Frost-free) – Dimensions are approximately 65 in. (height), 32 in. (depth), 33 in. (width)

#### ***How long will it take to receive the new refrigerators?***

It will take approximately 4–6 weeks for your refrigerator to arrive once the order is placed. The program administrator will contact all program participants once an exact date of arrival is determined.

#### ***Where will the refrigerators be exchanged?***

At home! Hawai'i Energy will deliver new units and remove the old units at no extra cost. Participants will then be contacted when the removal and delivery of refrigerators and freezers is scheduled.

#### ***Who do we contact in North Kohala if we have any questions?***

For assistance, contact Partners in Development Foundation: 808-884-5927.

#### ***Who is Partners in Development Foundation (PIDF)?***

Partners in Development Foundation inspires and equips families and communities for success and service, using timeless Native Hawaiian values and traditions. PIDF is proud to offer North Kohala residents this opportunity to save energy and money. For more information about PIDF visit: <https://www.pidf.org/>.

***Who is Hawai'i Energy?***

Hawai'i Energy's mission is to empower island families and businesses to make smart energy choices to reduce energy consumption, save money, and pursue a 100% clean energy future. We strive to achieve our mission by educating island families and businesses about the lasting benefits of clean energy and reward those residents who make practical energy-saving decisions. We look forward to working together with Partners in Development Foundation and North Kohala residents to save money, grow the economy, and reduce the demand for electricity imports.
